

Hi my names is Travis

I have recently completed two courses and gain six licences through TDT training.

The help I have received with this from the team was outstanding as my previous experience was in a office environment.

I felt very comfortable through my training and there wasn't any pre judgement and if I was unsure I felt more than comftable asking questions.

The courses I have completed are a certificate 3 in transport and logistics which gave me my heavy rigid licence and forklift, OH&S induction (Red Card as it was known). Competence in excavator, front end loaded, backhoe and skid steer. The trainers I had in both these courses were knowledgeable and had a real understanding of what the industry needed.

All staff at TDT training are very good at what they do and are more than willing to help you get through any challenges or concerns you have.

Since Completing these course I have been able to gain employment and change my career.

So if you want to do a course or gain extra licenses or skills I would be giving TDT a call.
