TDT Training

I would like to thank TDT Training for saving us from a bad experience with another training organisation. I am so glad I made the change as TDT have made the transition easy. They work with you each step of the way and our employees enjoy working with them. This benefits our staff in building their knowledge of the importance of knowing how to do their jobs the correct way. A lot of our staff are Cambodian and Vietnamese and their self esteem and confidence has grown since they have completed their course which also helps them instruct new workers. Quite often they will take a back step and pretend that they are not sure, but having done this course they openly help the other staff and I find they will lead by example. We have put about 6 of our staff through a Certificate III in Transport and Logistics and we are about to start again with another group of 4.

I would recommend TDT training to anyone who is considering putting their staff through course work. They will work with each staff individually and work with an interpreter if needed so that the staff know exactly what they are meant to be doing. Thank you to TDT Training.

Kind Regards

Anne Arnott
